only using one  
115,000 barrel  
tanks

Dear Ms. Self:

Please excuse the informality of my response to your request pursuant to Section 3007(a) of RCRA, however, my typewriter is down for repairs.

Delaware Petroleum, Inc is a year old corporation whose activities have involved the storage of No. 2 fuel oil at 6200 Philadelphia Pike, Claymont, Delaware. We have had no more than 50,000 bbl. on the premises at any time. When the property was sold to us by Texaco, all sludge and wastes were removed by Texaco from the sight.

Our 002 separator is a non mechanical gravity oil water separator. Once a month, analysis is done for oil, grease, and ph readings. If this information is not sufficient for your needs, please call me at the number →

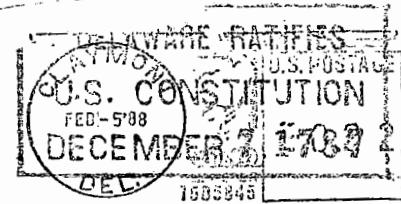

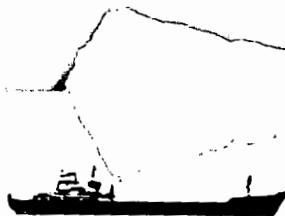

listed above.

Regards,

Colleen Mahoney
